NOARK and KDSI Signed an Agency Agreement

In the first half of 2015, NOARK signed an agency agreement with KDSI, which means KDSI becomes NOARK's first distributor in Japan. **Key words:**

KDSI, an EPC company headquartered in Tokyo Japan, purchased a batch of inverters from NOARK, which are mainly applied to their PV projects, and these inverters have got the certification from the Japanese equipment certification institution. KDSI states that they are not only interested in NOARK's converters, combiner boxes and AC/DC distribution cabinet, but also have faith in sales programs of CHINT subsidiaries' products.

**Agency agreement
KDSI Company
PV project**

As a breakthrough for NOARK in Japan market, the agency agreement further improves the market share of NOARK products and greatly expands NOARK's brand influence in Japan. Moreover, it lays a firm foundation for the further development of NOARK products in Japan market.

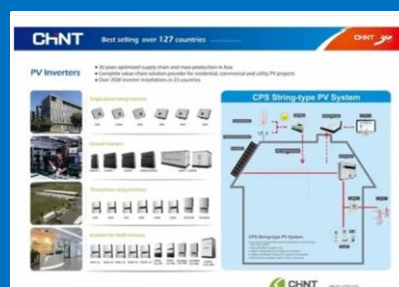

CHINT Participates in Middle East Power Exhibition

On March 2nd, CHINT displays its complete range of intelligent components and industrial comprehensive system solutions at the 40th Middle East Electricity (MEE) under the theme of "Green Energy, intelligent power", fully demonstrating its strength as China's leading company in industrial electrics and renewable energy.

It is learnt that the exhibition, sponsored by IIR Exhibitions, is one of the five most famous industrial exhibitions in the world. With the stable growth of international trade in the Middle East, MEE is attracting increasing attention of professionals and senior officials.

During the exhibition, CHINT's employees explained the technology in English and present a high-quality, high-level performance. The booth received more than a thousand visitors, including electrical appliance manufacturers, industrial customers, trading companies, commercial bureau personnels, etc.

This exhibition demonstrates the strength of CHINT brand, further enhances the trust of global customers on CHINT and promotes the in-depth development of CHINT in the Middle East market.

New Progresses in NOARK Europe

Apartment building in the Czech Republic

NOARK products are widely used in a residential building project with 35 apartments located in Prague, the Czech Republic.

Castle reconstruction in the Czech Republic

The old castle Prstná in the Czech Republic is under reconstruction. This historic building is energized under protection of NOARK components.

Office and warehouse building in Romania

The building of Transilvania Constructii located in Cluj, Romania is under construction. It is a new building combining functions of office and warehouse premises where NOARK products are used. From NOARK portfolio a wide variety of products used are MCBs, RCCBs, RCBOs, MCCBs, Contactors, MF enclosures.

CHINT Launched Products Seminar in Europe

From May 11th to May 15th of 2015, CHINT cooperated with Klinkmann, a famous Finnish distributor, and organized a couple of product seminars in the Finnish cities of Helsinki and Tampere, as well as Vilnius in Lithuania. The seminars attracted a large number of dealers and clients.

During the conferences in these countries, one of the product managers introduced the new 2014-2015 product sets and highlighted the low-voltage products. Attendees of the meetings recorded the introductions of products carefully. Among all of the products, an intelligent miniature circuit breaker drew the most attention. Compared to its predecessor, this intelligent miniature circuit breaker, which is called Remote MCB, has a remote control function, an exquisite appearance, and more reliable performance.

Thanks to the seminars, the European clients have greater understandings of the new products of CHINT. The seminars also helped CHINT increase business opportunities with consumers, satisfy product development to the market demand, and consolidate the foundation of business expansion in Europe.

NOARK Launched a Team-building Activity

On May 12th, 2015, in order to enrich the employees' spare life and activate the staff's working enthusiasm, a unique cooking competition was held at NOARK in Prague, Czech.

The staff from headquarters and the local employees from Czech joined the competition. In the competition, participants were divided into several groups. Each group received a detailed menu and made the whole dish together with the guidance of a head chef. This is a big challenge about group cooperation and communication.

This competition ended in a relaxing and pleasant atmosphere. The game not only provided a great opportunity for employees to communicate with each other and alleviate working stresses, but also improved their sense of belonging to the company.
