CHINT Forges into Caribbean Hotel Industry

Recently, CHINT provide GGD low voltage distribution switchgears for Karisma Hotel’s resort hotel project in Bavaro, Dominica, mainly for low voltage distribution protection and control.

It is learned that in the Central America and the Caribbean, Karism Hotel Group owns dozens of five-star hotels, and the construction of the resort is scheduled to be completed in June 2016. The successful signing of this project is inseparable of the unremitting efforts of CHINT Latin American sales team and CHINT distributor, and the second batch of same type switchgear is on technical design and proposal stage.

This is the first application that CHINT provide complete system solution for Latin American Hotel, and lays good foundation for CHINT to develop business in Hotel industry.

New Ambassador of India to China Visited CHINT in Shanghai

Mr. Vijay K Gokhale, new ambassador of India to China, visited CHINT Shanghai Industrial zone on February 22. The ambassador's visit to CHINT was accompanied by Mr. Nan Cunhui, Chairman of CHINT Group, and other top management members.

During the visit, Mr. Nan introduced CHINT development history and project status in India; they also exchanged in-depth thoughts on future cooperation. It is learnt that CHINT has been working in Indian market for years, and has developed four regional marketing networks respectively based on New Delhi, Mumbai, Bangalore and Calcutta, and has successfully entered India in such industries as telecom, utility, elevator industry, HVAC and renewable energy industry etc..

Mr. Vijay K Gokhale has great expectation on further cooperation between CHINT and India. He said that currently Indian government is vigorously support Chinese enterprises to participate in India's development, and wants to strengthen energy construction especially the development of clean energy.

CHINT in the ELECRAMA2016

While most Chinese are enjoying their spring festival, CHINT staff headed to Silicon Valley of India Bangalore to attend the 12th ELECRAMA in India.

ELECRAMA, founded in 1990, was held in Bangalore international exhibition center, and was sponsored by the India electrical and electronic association, which now becomes the world's largest electric power industry exhibition. During the exhibition, CHINT displayed its full range of electric products covering whole industrial chain, and also showed HVAC system, generator system and critical power system solutions, which receives many positive feedbacks. Many professional visitors also showed interests in CHINT's technical and product seminars, and CHINT also interviewed by Phoenix TV and the organizers.

Through this exhibition, CHINT greatly improves its brand recognition, and lays a solid foundation for CHINT further development in India market.

NOARK in AHR EXPO

From January 25th – 27th, 2016, NOARK Electric participated in the International Air-conditioning, Heating and Refrigerating Exposition. AHR EXPO, the largest specialized HVAC exhibition event in the world, has been an important international platform for the global air conditioning refrigeration industry. During the exhibition, NOARK showed the HVAC solution, new DP contactors and MCP. NOARK staff held some meetings with clients and received many positive leads.

NOARK has been focused on HVAC, photovoltaic and other industries for years, and centered on the industry to develop products and system solution to meet customer demand. NOARK further improves its brand recognition through this exhibition, and expecting to bring more surprises for the next year.

CHINT Launched Technical Seminar in Russia

On January 22, 2016, CHINT held a training seminar on low-voltage products with the assistance of the company “Electro-Profi” in Moscow. Most of participants were general directors of 9 regional offices of the company “Electro-Profi” and their regional sales managers.

During the seminar, the participants learned a lot about the company CHINT as a leading manufacturer of electrical equipment of China. Much attention was devoted to the topic of the quality control because all products are fully in the line with Russian and international technical standards which ensures high reliability and convenience for the application.

The presentation aroused a great interest according of numerous audience questions. CHINT expresses its gratitude to participants and thanks the company “Electro-Profi” for the high level of the organization of the seminar.
